

Webinar:

Climate change adaptation on European islands

Organices

With the support of

EU Islands Facility NESOI

Alessandra Montanelli – Sinloc S.p.a.

Objectives

Concrete support to energy transition

The European Islands Facility NESOI was kicked off in October 2019 and it will operate at local and European level until 2023

Selected islands will benefit from **Technical Assistance** provided by NESOI's professionals supplemented by local contractors

NESOI will allocate **€ 3.1 mln to Local Authorities** and **complementary on-site support** by the Consortium

Creation of a **Platform** for best practices exchange and communication and dissemination activities

Objectives

Steps of the implementation process

1. Call for proposals

- Local entity participation
- Selection of beneficiaries

2. Technical assistance

- Provision of financial resources and technical support

3. Implementation

- Carrying out of planning and project implementation
- Activate additional investment
